DETAILED ACTION***Examiner's Comments***

Applicant's election without traverse of Group I, claims 1-45 in the reply filed on May 11, 2007 is acknowledged.

For applicant's information, upon further review of the claims, the examiner determined multiple species were present within elected group I, thus requiring a new restriction requirement as shown below.

Election/Restrictions

This application contains claims directed to the following patentably distinct species: Group Ia, claims 1-16 and 33-45, Group Ib, claims 17-31, and Group Ic, claim 32. The species are independent or distinct because of the following reasons. Group Ia, claims 1-16 and 33-45 are drawn to a species of methods of determining whether an image of an eye is of a left eye or a right eye, specifically comprising the steps of locating an iris center on the image, locating a corneal vertex on the image and comparing the location of the corneal vertex relative to the iris center as shown in Figure 4; Group Ib, claims 17-31 are drawn to a species of methods of determining whether an image of an eye is of a left eye or a right eye, specifically comprising the steps of locating a pupil center on the image, locating a corneal vertex on the image and comparing the location of the corneal vertex relative to the pupil center (i.e. skipping the step of locating the iris center) as disclosed as a second embodiment in paragraph 52; and Group Ic, claim 32 is drawn to a species of methods of determining whether an image of an eye is of a left eye or a right eye, specifically comprising the steps of locating an iris center on the image, locating at least one reflection on the image, and comparing the location of the reflection relative

to the iris center (i.e. skipping the step of locating the corneal vertex) as disclosed as a third embodiment in paragraph 52.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the

Art Unit: 2873

inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica T. Stultz whose telephone number is (571) 272-2339. The examiner can normally be reached on M-F 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Mack can be reached on 571-272-2333. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
